Memories of Dr. Brad Walker

Dr. Walker took care of me for many of (North Cornwall) winters. I suffered with Croup, Bronchitis, and Pleurisy....

It was a blessing for my mother, and me, that he made "House Calls" and always came even after a full day between Cornwall and Torrington.

He always called me "Brown Eyes." I remember one night when he came and I was very sick and he said to me," Well Brown eyes, did you pop your Cookies" ZZZ And I looked at my Mom in fear — cuz I did NOT Know WHAT he was talking about. My Mother whispered — " Bowel Movement" ☺

Mom went to see him one day and when she was called into his office she said, "Brad, tell me more about Diverticulitis" ZZ

and he answered – "Now Huldah –
How in Hell did you hear about
Diverticulitis ??? and she said, "I
just read about it in your "Medical
Magazine" while waiting for you.....
He answered – "Well – you don't have it –
so you don't need to Know about it!!! ☺

Dr. Walker took care of me and
delivered my three children.
