

Thank you for the opportunity to bring back memories of Dr. Walker. I am a Dr. Walker "baby", as were my two sisters and several cousins. I wonder if anyone ever counted all of Dr. Brad's "babies"?

I lived in Cornwall with my grandmother, and had no car. I remember many times when I was ill, Grama would call Dr. Walker, and he always came - examined, diagnosed and left what ever medicine I needed. No need for pharmacies.

My most personal memory was when I was about 11 years old and the school nurse said I needed my tonsils and adnoids removed. As I said we had no car, so Dr. Walper drove me to Charlotte Hungerford, removed my tonsils and adnoids, and when I was released, he drove me home.

Only in a small town like Cornwall with an old Country Dr. would this happen.
